Service-Disabled Veteran-Owned
Small Business (SDVOSB)

Est. 2014 · Virginia

COMPANY OVERVIEW

Armour Wireless Solutions is a VA-certified Service-Disabled Veteran-Owned Small Business founded by President and Owner Bill Armour, a Navy Electronics Technician Chief with a 20-year career spanning legacy shipboard communications, the first fiber-optic backbone deployed aboard a Navy destroyer, and White House-level communications support. The company coordinates the technical, operational, and government-facing work required to bring carrier wireless infrastructure onto military installations.

CORE CAPABILITIES

- Cell site lifecycle management — coverage-gap identification through authority to operate
- DAS and cellular repeater design and deployment, including military hospitals
- Wi-Fi design and deployment across multi-building and remote installations
- Spectrum analysis and lease/approval support for carrier infrastructure on federal property
- Military base coordination — navigating DoD-specific technical and approval requirements
- Wireless and cellular consulting for carriers pursuing on-installation coverage

DIFFERENTIATORS & PAST PERFORMANCE

- Currently manages the full lifecycle of 350+ on-air cell sites and 150+ more in development on military bases for a major wireless carrier.
- White House Communications Agency — Vice Presidential Communications Officer supporting two U.S. Vice Presidents, White House Staff, and the U.S. Secret Service.
- Designed and deployed Wi-Fi access for 3,400+ transient rooms across Naval bases (NEXCOM), plus Wi-Fi support for Marine Corps Community Services facilities.
- DAS and cellular repeater deployments at military hospitals, including Brooke Army Medical Center, Balboa Naval Medical Center, and the Camp Pendleton Naval Hospital.
- Supported the Pentagon Renovation Program's National Military Command Center and the Secretary of Defense's Executive Support Center secure/non-secure telecom transition.
